This map is for planning purposes. The data elements are not drawn to scale; however, in some cases dimensions and other measurements are provided in the associated database. The map reflects the approximate location of recommendations and shows only a portion of the data collected. Additional engineering analysis, design, or public input may be required before implementation. In some cases, further study will be required. Drainage, existing utilities and ADA compliance will need to be evaluated for all recommendations at the time of design and right-of-way was not evaluated as a part of this project.
